SCULPTURES BY NATHALIE DECOSTER

83

Nathalie Decoster uses recycled materials to create her sculptures, populated with figures that tell universal philosophical or humorous tales. They show the smallness of humanity compared to the universe, yet how important the universe is for life. Nathalie Decoster normally uses brass in her sculptures. These are some of the first examples of her work to utilise scrap stainless steel as a raw material.

Location | FRANCE AND BRAZIL

Environment | OUTDOOR

Product

Fabrication process | CASTING

Grade/surface | 304

Material thickness/diameter | SCRAP

Weight | 8 TONNES

Competing material | BRASS

Date of Completion | 2010

Manufacturer

Material Supplier | APERAM STAINLESS & ELECTRICAL STEEL BRAZIL

Source of Information | APERAM STAINLESS & ELECTRICAL STEEL BRAZIL

Remarks
