

## Industrial Machinery

### Biogas Plant

The plant is made of Verinox coil with LIPP bending technique. Verinox coil consists of two layers, one of stainless steel and the other of galvanised iron. The layers are connected using pressure adhesion.

**Location/environment** | SOUTH KOREA/OUTDOOR

**Product** | COLD ROLLED STAINLESS STEEL SHEET

**Fabrication process** | FORMING AND BENDING

**Grade/surface** | STS314T/2B

**Material thickness/diameter** | 0.3 MM STAINLESS STEEL/TOTAL 2.5 MM

**Weight** | 10 TONS

**Competing material** | PLASTIC, CARBON STEEL

**Date of completion** | OCTOBER 2008

**Manufacturer** | JUNGLIH NATURAL INDUSTRY

**Material supplier**

**Source of information** | KOSA

**Remarks** | MATERIAL THICKNESS CAN BE MODIFIED DEPENDING ON THE CUSTOMER'S PREFERENCE OR PURPOSE.
