

## Cookware

# Double Wall Food Transport Container

The double wall food container is designed to carry up to 30 litres of hot or cold food. The double wall provides insulation during transport, ensuring the food arrives fresh and ready to use. The container also comes with three internal, 10 litre pots, enabling you to carry three different types of food at the same time. A special lid form prevents leakage and spillage.

**Location/environment** | TURKEY/INDOOR

**Product** | COLD ROLLED STAINLESS STEEL

**Fabrication process** | DEEP DRAWING, SATIN POLISHING AND POINT WELDING

**Grade/surface** | 304/SATIN FINISH (HAIR LINE 360 GRADE)

**Material thickness/diameter** | 1.00 MM INNER AND OUTER WALL, 0.80 MM INTERNAL POTS

**Weight** | 9.7 KG

**Competing material** | ALUMINIUM

**Date of completion**

**Manufacturer** | OZTIRYAKILER METAL GOODS

**Material supplier**

**Source of information** | PASDER
