

Glass Facade "Spiders"

Why stainless?

- Good mechanical properties
- Low maintenance
- Aesthetics.

Fabrication process:

Forged or cast body. Fastening elements machined from bar.

Grade:

EN: 1.4542 (AISI: 630) and EN: 1.4462 (ASTM: F51).

Manufacturer:

Not available.

The glass panels on the façade are held in place by high strength "spiders" which carry the weight of the glass.

Although their primary function is mechanical, their appearance does not detract from the overall elegance of the structure. They are expected to last as long as the building itself without any risk of damage or collapse.
