

Guardrail Cables

Why stainless?

- Aesthetics
- Good mechanical properties.

Fabrication process:

Wire rod is drawn into high strength wire, then twisted into cables.

Grade:

EN: 1.4401 (AISI: 316) and EN: 1.4310 (AISI: 302).

Manufacturer:

Not available.

Initially used on yachts, these guardrail cables have found new uses in buildings and other public spaces. They enable elegant designs and still admit the maximum amount of light.
