Vespa Silencer

The era of the 1950s and 1960s is still evoked by the latest Vespa. The iconic scooter maintains its charm, even with the addition of advanced modern technology such as its stainless steel silencer. Made almost completely of stainless, the silencer for the LX 125cc and 151cc 4T models enhances the environmental credentials of the Vespa by reducing emissions and noise pollution. Studies and tests are still underway to ensure this delicate component is increasingly efficient, strong and continues to eliminate noise and other pollution.

Location/environment | WORLDWIDE/OUTDOOR

Product | STAINLESS STEEL SHEET AND TUBE

Fabrication process

Grade/surface | EN 1.4301 (AISI 304) / EN 1.4512 (AISI 409)

Material thickness/diameter

Weight | INTERNAL 1,654 KG; EXTERNAL 2,710 KG

Competing material

Date of completion

Manufacturer | PIAGGIO & C. SPA

Material supplier

Source of information | CENTRO INOX

Remarks

57
