

Congress and Music Hall

Strasbourg, France

Thanks to a major renovation, Strasbourg's Palais de la Musique et des Congrès (PMC) has doubled its capacity and provided the Orchestre Philharmonique de Strasbourg (OPS), its resident symphony, with state-of-the-art facilities. The renovations optimize office space, add rehearsal rooms, improve acoustics and increase seating capacity. But it's not just the inside that benefits from these renovations, the outside facade has too. The 14 m stainless steel columns that encompass the site's three parts now stand as the PMC's architectural signature. The columns use a 304/1.4301 grade with a Uginox Mat appearance.

Environment:	urban
