Ping An Finance Center, Shenzhen, China

Architects: Kohn Pedersen Fox (KPF), New York

With a height of 599 m and over 100 office floors, the Ping An Finance Center will be the tallest building in Shenzhen. Linen-finished stainless steel was selected for its material contrast with the other visually dominant materials which are glass and stone. The reflective surface also contributes to the sustainability of the building, which is LEED gold pre-certified.

Details

Environment:	Urban
Fabrication process:	Brake pressing
Grade and finish:	316L, 2M (Linen 25)
Material thickness:	2 mm
Weight:	1,700 t
Date of completion:	2018
Material supplier:	Outokumpu Nirosta GmbH
