

Torbellino

Torbellino is located at the Credi-Nissan Corporate Offices in Aguascalientes, Mexico. It is also a creation of Yvonne Domenge and was completed in 2007. The sculpture resembles a ribbon rising from the cube of light. The stainless steel ribbon is 7 metres high, with a diameter of 2.5 metres. The effect is visually stunning! Only stainless steel can give a designer the unique properties of strength and aesthetic appeal to create such an effect.
