## Ping An Finance Center, Shenzhen, China

**Architects: Kohn Pedersen Fox (KPF), New York**

With a height of 660 m and over 100 office floors, the Ping An Finance Center will be the tallest building in Shenzhen. Linen-finished stainless steel was selected for its material contrast with the other visually dominant materials which are glass and stone. The reflective surface also contributes to the sustainability of the building, which is LEED gold pre-certified.
