

Urinals

Stainless steel urinals are sleek with both classic and modern touches. Luckily, the metal is not just beautiful, but highly functional too. Stainless steel urinals are durable, hard wearing and vandal resistant.

The robust structure, which should be mounted with stainless steel fixings, enables maximum usage with minimal maintenance, cleaning with water and soap is enough. Stainless steel is one of the most hygienic materials and does not support the growth of bacteria and other pathogens.

Stainless steel is very tough, and even lightweight stainless steel won't buckle under great weight, making it one of the most durable metals on the market. It can endure weight, hot and cold temperatures as well as weather extremes.
